GIAN RUBILLAR CABRERA

Software Developer | Public Health Analytics | Health Decision Support Systems
Davao City, Philippines | 09489073054 | gianrubillarcabrera@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Junior Programmer and software developer specializing in public health analytics and health decision-support systems. Experienced in leading RabDash application development, maintaining operational digital health platforms, building full-stack dashboards, and coordinating technical implementation with research teams and government partners.

TECHNICAL SKILLS

Development: Vue 3, Vite, Tailwind CSS, JavaScript, React Native, Node.js, Express, REST APIs, PHP/Laravel, Python
Data & Analytics: MySQL, MongoDB, Power BI, Excel, CSV/Excel processing, dashboard metrics
Tools: Git, GitHub, Postman, VS Code, Cursor, Hostinger, Vercel, XAMPP

PROFESSIONAL EXPERIENCE

Junior Programmer | **DiWA Center, University of the Philippines Mindanao** | Jun 2026 - Present

- Lead RabDash DC: maintain and improve its web-based rabies data system for the City Veterinarian's Office, and build its full-stack mobile app, in line with Center and partner requirements.
- Building the full-stack RabDash DC Mobile app (in active development) with React Native, Express.js, Node.js, and MySQL, integrating the mobile interface, backend APIs, database workflows, and testing.
- Support coding, testing, optimization, troubleshooting, deployment, and maintenance of software systems; coordinate technical integration with programmers, researchers, faculty, and external collaborators.
- Prepare technical documentation on codebase management, system architecture, workflows, and user guidance; serve as a technical point of contact for stakeholder updates and system concerns.
- Develop operational dashboards and support app pitching, research proposals, user training, mentoring, and other Center technical requirements.

Computer Programmer I | **DiWA Center, University of the Philippines Mindanao** | Aug 2024 - May 2026

- Developed and maintained public health dashboards and decision-support systems using Vue, Node.js, Express, MySQL, MongoDB, and Power BI.
- Maintained RabDash DC for the City Veterinarian's Office, resolving bugs, updating analytics outputs, and supporting reporting and user-training workflows.
- Contributed to AI-assisted reporting, technical specifications, feasibility inputs, proposals, documentation, and the International Workshop on Mathematical Biology 2025 website.

Student Researcher & Summer Intern | **RabDash DC, University of the Philippines Mindanao** | Mar 2023 - Jun 2024

- Developed and tested an Android rabies-reporting application and supported historical vaccination data digitization and migration.

SELECTED PROJECTS

RabDash DC Web & Mobile Systems - Maintain and improve the web-based rabies reporting system used by the Davao City Veterinarian's Office; building its full-stack mobile app (React Native, Express.js, Node.js, MySQL).
DiWA Disease Surveillance Dashboard - Built and refined full-stack disease analytics and reporting modules, including performance and usability improvements.
AI Hybrid Disease Reporting - Supported multilingual AI-generated disease summaries and caching strategies for consistent, efficient reporting.

EDUCATION

BS Computer Science | University of the Philippines Mindanao | 2024 | Cum Laude

- Finalist - Best Thesis in Computer Science (Poster Presentation); thesis focused on a centralized mobile rabies vaccination reporting mechanism.

TRAINING & LEADERSHIP

Python Asia Conference 2026 | UXPH 2025 | PyCon Davao 2024 | Mindanao Startup Summit | RabDash DC Lead Trainer | SK Secretary, Barangay 26-C
